# Inspiring Designs from the Furniture Industry Made Their Mark in 2023

2023 was a busy year for the furniture sub-industry. The furniture accessories industry exhibited its products which stood out with their aesthetic designs, functional features and sustainable materials at the Intermob Fair.

Dating back over a quarter century in time, the Intermob Fair is among the top three largest fairs across Europe in its field and the largest and most comprehensive specialized fair in Eurasia. It serves as an effective trade platform for the furniture sub-industry and wood industry facilitating their access to world-wide markets, and plays a significant role in the development of new designs that inspire the future. The fair, which was held at the Tüyap Fair and Congress Center in Istanbul from September 30th to October 3rd, 2023 in cooperation between RX Tüyap and the Turkish Furniture Accessory Industrialists Association (MAKSDER), hosted 554 local and foreign companies and company representatives in an indoor area of 120,000 m<sup>2</sup>.

A total of 37,610 qualified industry professionals from 112 countries, including Türkiye and especially countries in Europe, the Balkans, Africa, Central Asia and the Middle East, visited the fair.

RX Tüyap General Manager Berkan Öner stated that 98% of the exhibiting companies were satisfied with the fair in 2023 and said "The Intermob Fair brought together the leading designers, manufacturers and suppliers of the furniture industry, and exhibited the trends and innovations that shaped the industry. The fair brought together a wide range of products and services, from furniture accessories with high aesthetic value to machines that increase efficiency in manufacturing.

2023 was a year when sustainability came to the fore in the

furniture sub-industry. The industry has taken its environmental responsibility one step further by focusing on recyclable materials, energy-saving manufacturing processes, and eco-friendly designs, products and solutions. This eco-transformation is shaping not only the products, but also the future of the industry.

The 25<sup>th</sup> edition of the Intermob Fair, which took place in 2023, meant a great deal for us in the context of celebrating the 100th anniversary of the Republic of Türkiye. Thus, in collaboration with the furniture accessories industry, Intermob has added a new one to its achievements in its 25-year history."

## Intermob continues to grow on the back of 3 basic principles:

- **Aesthetic and functional design:** 2023 was a year in which functionality as well as aesthetic designs were at the forefront in the furniture accessories industry. Smart storage solutions, combined with practical and stylish designs, are offered to the industry.
- **Sustainability:** Furniture accessories manufacturers have increased their efforts to reduce their environmental impact by focusing on sustainable materials and production processes. Sustainability will continue to be the main dynamic of the industry throughout 2024. Recyclable materials as well as energy-saving and eco-friendly designs will lead the way in reducing the environmental impact of the industry.

# INTERMOB

*RX Tüyap  
General Manager  
Berkan Öner*

• **Innovation:** Thanks to improved and accelerated production processes, the number and diversity of innovative designs have increased across the industry. The latest developments in this field transform furniture accessories from ordinary items into special pieces that make living spaces more functional and aesthetic.

### **Intermob Will Continue to Showcase New Trends and Technologies in 2024**

In 2023, the furniture sub-industry grew with a focus on aesthetics, function and sustainability. The Intermob Fair has become an important platform that shapes the innovations and future vision of the industry. The industry is expected to continue this positive momentum and achieve further progress in

the fields of technology, design and sustainability in 2024, too. The Turkish furniture sub-industry, which has matured enough to compete with its counterparties throughout the world, will continue its progress in 2024 with the aim of expanding further into global markets. The international competitiveness of the industry will increase through international collaborations, new market entry strategies and efforts to improve brand awareness.

The Intermob Fair, which will be open to visitors for the 26th time at its usual address, i.e. Tüyap Fair and Congress Center in Istanbul, on September 12-15, 2024, will bring together the global players of the furniture side industry to help with these goals and enable the creation of new business connections and business opportunities.

# MOBİLYA MAGAZINE

Prepared the

# 2024 Accessories Sector Report

Research:

**Nesip Uzun**

*editor-in-chief of furniture magazine*

[nesipuzun-4@hotmail.com](mailto:nesipuzun-4@hotmail.com)

Issues such as scaling of the sector, statistical information and database in the Turkish Furniture and sub-industry sector were one of the most important problems that could not be solved for years. FURNITURE MAGAZINE has carried out a comprehensive study in the ACCESSORY sector for 2024 with meticulous work and completed the study.

This sector research conducted by Furniture Magazine among furniture and sub-industry and accessory manufacturers created this data by coding company names with hundreds of questions and choices in the form of a survey and using scientific algorithms. As a result, the answers given in 3-4 questions of each question revealed the database and interface of the sector. Transcribing the hundreds of answers received into statistics, explaining and interpreting the value chain in each question was the product of months of very meticulous work. Anyone who reads this research report will be able to see the contribution of the Turkish accessory industry to the country's economy, the added value it produces, the size of its investments, its technology and manpower, and its international competitive opportunities. We can better understand the content of the study with some headings:

## With main headings:

### Weaknesses and strengths of the Turkish furniture accessory industry:

Although the Turkish furniture accessories and sub-industry sector stands out with its many strengths, it also has some weaknesses. In this study, many aspects of the sector are discussed in detail.

#### • Social organization and unionization in the furniture accessory sector:

- R&D investments. - Export Potential. - Competing with International Brands. - Capital size, investments in 2023 (Building, R&D, machinery, etc.). - Its place in the Turkish economy - Total production volume and exports in 2023. - Export countries. - Extensive analyzes such as design and engineering are carried out in the sector. This research is an important source of information for companies that invest or will invest in the sector.

The study in question has been presented to the service of the sector.

• This research file was prepared by the MOBİLYA DERGİSİ, and the text contents, statistical information, pies and graphs in it cannot be used or quoted in any way without paying copyright fee. It is purchased once and cannot be used for marketing purposes. The original file of the study consists of 19 pages in PDF format.

## Editorial

# Turkish furniture industry is growing despite the global crisis

The 4<sup>th</sup> Industrial Revolution changed many established concepts and production systems. The world's giant manufacturing industry companies remained small capitals compared to the new actors of the digital world. As technology develops, the world becomes smaller, social alienation turns into individual alienation, and we become objects controlled by the artificial intelligence of smartphones. Most of the production is done by machines and programs. The place of humans in the total production process is decreasing every year. This covers a wide range of processes, from production processes to programming, from logistics to transportation. Amazon is already planning this with drones. Industry 4.0 has become a part of our daily lives. Dark room production has already started to take place in the furniture panel industry. This situation increases the production volume to extraordinary levels and does not give small businesses the right to survive.

Turkey has become a regional power in the last 5 years, especially in the production of furniture accessories and forest products. It is a sector that grows every year with a production volume approaching 13 million. Likewise, in our latest research on furniture accessories, it has become a sector that exports to almost all continents and constantly increases capacity with building and personnel investments. There are global brands among them. They are opening factories in many countries and increasing their market shares there. Importance is given to R&D and design. From electronic engineers to industrial engineers, architects, mechanical engineers and business experts, they create significant employment here. To summarize, for now, the key to growth is a Turkish furniture, accessory and panel industry that grows with local and international fairs and exports.

Kind regards

**International Istanbul Furniture Fair  
was met with intense interest this year too**

144,196 industry professionals from  
152 countries visited

# IIFF 2024

## Fair

in 6 days

IIF International Istanbul Furniture Fair, which is among the three most prestigious furniture organizations in the world and accepted as the largest of all sectoral fairs in Turkey, was visited by a total of 144,196 people from 152 countries. MOSFED President Ahmet Güleç said that nearly 1000 companies took part in the fair with more than 3,000 brands, using all 26 halls in Tüyap Fair and Congress Center and Istanbul Expo Center (IFM). Güleç pointed out that billion-dollar new business agreements were made at the fair over the years. TÜYAP Fairs Production Inc. General Manager İlhan Ersözlü also gave serious support to the Turkish economy. He announced that the 2025 work calendar of the contributing organization has been determined. İlhan Ersözlü noted that IIFF 2025, Turkey's most important brand organization in the world, will open its doors on January 21-26 with a stronger participation.

The International Istanbul Furniture Fair (IIF 2024), which is among the top three most prestigious furniture meetings in the world and was held for the third time this year, has ended. Around 1000 companies and more than 3000 brands participated in the fair, which was held simultaneously at Tüyap Fair and Congress Center and Istanbul Expo Center and was established on a total area of 260 thousand square meters. Industry professionals from home and abroad attracted great interest in the six-day fair. Both fairgrounds hosted a total of 144,196 visitors, 25,364 of whom were foreigners.

### Target Number in Furniture is 12 Billion Dollars

Evaluating the International Istanbul Furniture Fair, MOSFED President Ahmet Güleç said that they were very pleased with the intense interest shown in the organization that supports and expands the story of Turkish furniture in the world. Güleç explained the future goals of the industry and the mission of the fair as follows: "The furniture industry, which exports almost half of its 12 billion dollar production, shows a rare example of success in Turkey with this feature. Our exports, which were 250 million dollars in 2001, approached 5 billion dollars in 2022 and 2023. With an export increase exceeding 20 times, the furniture industry showed a performance that differentiated itself from other sectors in this process. As a sector, we rose from 36th in the world export rankings to 7th in 2023. We aim to be among the top 5 in global furniture

exports, and we want to increase our exports to 12 billion dollars by 2028. "The International Istanbul Furniture Fair has become one of the world's brand organizations and plays an important role in achieving our future goals."

### **Istanbul Became the Meeting Center of Furniture**

Stating that a total of 144 thousand 196 people from 152 countries came to Istanbul with the fair and that the city became the meeting center of furniture for six days, Güleç said, "Today, Turkish furniture adorns houses in 200 countries in the world. We grow the power we have gained in quality and design with continuous investments. 20 thousand of our more than 45 thousand furniture manufacturers are exporters. As a sector, we employ 5 percent of those working in the manufacturing industry. We think that we are one of the sectors that should be given special attention. As our production and exports increase, Türkiye will earn more. Because we are an 80 percent domestic industry in terms of production, and our accumulated foreign trade surplus in the last 20 years has reached a total of 35 billion dollars. Having a brand organization in the world will further support our production and export power." For this reason, we are working hard with all our partners to develop the IIFF International Istanbul Furniture Fair."

### **Great Contribution from Tüyap and Mos Fuarçılık to Furniture Sector Exports**

Stating that the fair attracted great attention from all over the world, TÜYAP Fuarlar Yapım A.Ş. General Manager İlhan Ersözölü said, "With the organization we organize in cooperation with Tüyap Fuarçılık, MOS Fuarçılık and MOSFED, we are trying to make the highest contribution to the production and export target of our country's furniture industry. We would like to thank the Federation of Furniture Associations (MOSFED), MOS Fuarçılık, all furniture associations and our participants for their valuable contributions. "On the occasion of the fair, buyers from 152 countries cooperated with our manufacturers for the new period, and we wish them good luck," he said. Stating that industry professionals from 152 countries, especially the USA, Germany, England, France and Belgium, came to the fair, İlhan Ersözölü added that the 2024 furniture models exhibited were highly appreciated.

## LONG-LASTING VARNISHES WITH ANTIMICROBIAL PROTECTION

Antimicrobial protection with a single application  
7/24 efficient, long lasting performance.

*Since 1975,  
with confidence...*

# AGT WIND AT DOMOTEX 2024

AGT, which focuses on wood with passion, attracted attention at the Domotex Fair held in Hannover, Germany, where innovative models of the flooring industry were exhibited. At the fair, which attracted great interest from visitors, not only AGT's collections produced from natural wood with superior technology, but also its environmentally friendly approach were appreciated.

The environmentally friendly production of the new collections exhibited at the fair was appreciated by the visitors. AGT, which shows how to respect nature while creating the concepts of aesthetics, quality and design, shared the colors and patterns that will shape the trends of the future with the principle of sustainable aesthetics.

Parquet collections developed for breathable, healthy spaces, and sound-absorbing wall panels and profiles attracted attention with their richness of colors and patterns, as well as their superior technological features. The jointed 2024 colors and patterns stand out with their natural tones and textures, exhibited for the first time in the international arena. Luna, jointless Bella Neo Collection, Camellia, Lotus, Yuka, Vera; Natura Line with its natural texture; Lena and Gila; Hudson, Novaya from the Marco Polo Collection, preferred by adventurous souls with its contrast transitions; Termessos, Teos from the Natura Select Collection with its admirable color and texture; Astaya, Sava from the Yoga Collection, which eliminates static electricity charge in your body with its antistatic feature; Murano, Monte and Modena from the 72-hour water-resistant Mood Collection met with their visitors.

Comfortech technology developed by AGT for parquet products became the center of attention at the fair. AGT flooring products with Comfortech technology absorb the sounds that may occur on the floor and prevent them from passing to the

next floor. In addition, it makes laying the parquet practical and eliminates the need to lay an extra mattress on the floor.

Classic Oak, Milled Oak, Sooty Oak, Wood Oak, ST Tile, ST Beige Grey, Super Matte Light Grey, Matte Studio Grey, Super Matte Light Cream, HG Onyx Grey, HG Light Grey, HG Diamond Grey, Slate, added to the Trendy collection. Pearlescent Marble, Tokyo Grey, Tokyo White, Spectrum Rose , Spectrum Dark, Spectrum Blue, Spectrum Light colors were applied to the profile area and presented to the visitors. AGT visitors, who have been the source of thousands of designs by allowing wooden products to match each other perfectly, were able to observe that parquet and profiles designed to create unique spaces can be used in the field of decoration with a wide range of combination options.

### **Sustainable Naturalness of Wood with the AGT Difference**

Producing natural wood with advanced technology to create breathable spaces, AGT parquet does not deviate from its line in the production of panels, profiles, MDF lam and MDF products. AGT, whose materials are obtained from PEFC and FSC Certified sustainable forests and can be processed perfectly, continues its environmentalist attitude. While preserving the natural color and texture of wood in its products, it also stays away from chemicals that are harmful to human health. Environmentally friendly wooden products with high scratch resistance also prevent waste generation with their long service life and secondary use opportunity.

The profiles in the EPD document prove AGT's meticulous approach on this issue. AGT calculates and reports the entire process from the procurement of the material until it reaches the end user, as well as the lifespan of the material. For this reason , it was entitled to receive the Environmental Product Declaration (ISO 14025) , known as EPD . Although AGT stands out with its innovative approach and superior technology applied to wood, it is known for being friendly to nature.

# IMM Cologne Fair 2024

brought the interior  
industry together

IMM made an impressive return to the international Interior Business Event with its new main theme and the concept of the fair: "The Circles".

After five days of lively exhibition activity, IMM Cologne finished with excellent results. Between 14 - 18 January 2024, interior design professionals from all over the world came together at the Cologne messe fair in Cologne. Nearly 42,000 visitors from 129 countries used the international trade event to connect, grow their business and gain inspiration. In addition to the trends and product innovations presented by approximately 750 exhibitors, the reconceptualized trade fair was highly effective, highlighting a variety of events in line with the slogan "Connecting Communities". With this strategy, the Interior Business Event took the pulse of this year's fair and became an important milestone in the further evolution of Imm Köln. Next year's edition of the fair is also planned for January.

"Under the banner of 'Connecting Communities', imm Cologne played a decisive role together with its partners in the industry and retail sector in promoting networking in the interior design sector at the beginning of the year.

"We are writing the next chapter in the trade fair history in Jan-

uary 2025. imm cologne continues to be a new source of inspiration for the international interior industry," said Leo Lübke, President of the German Furniture Industry Association, and Gerald Böse, Chief Executive Officer of Koeln messe. (VDM) also underlined imm cologne's position as an important link in the furniture industry: "The trade fair provides a central business platform for all industry participants to present new launches, network, especially in challenging times. In January, Cologne, Germany "We see once again that it has a wide range of home life and interior design issues across the board." said The new trade fair concept encourages networking.

Highlights of this year's imm cologne edition

Among the highlights of the event, organized as part of the holistic trade fair concept, was the imm cologne summit, organized in cooperation with VDM and BVDM. The congress shed light on opportunities for the interior design industry and outlined approaches that participants can take to successfully prepare for the future. The Pure Talents Competition also provided insight into what the future of interior design will be.

Now celebrating its 20th anniversary, the prestigious design competition celebrates up-and-coming talent. It demonstrated its high interest in a record number of young creative professionals with more than 1,000 applications.

The designs focused on working with sustainable materials and exploring circular product concepts. The Circular Collaboration Network Day (CCND), organized jointly with the FURNITURE industry 4.0 initiative, was also devoted to discussions and exchanges on the challenges of transitioning to the circular use of resources. Additionally, famous design studios and well-known names enriched the trade fair with artistically designed installations. These creative elements created an inspiring atmosphere and gave attendees the opportunity to taste the latest design trends.

### **Cologne: a center for interior design**

Traditionally, PASSAGEN Interior Design Week took place parallel to imm Cologne this year. A wide range of events, including around 150 exhibitions, were hosted throughout Cologne

city centre, in numerous showrooms, galleries, furniture stores, cultural institutes, museums and universities. This impressive series attracted many visitors and once again turned Cologne into a magnet for design enthusiasts from around the world.

#### **Imm Cologne 2024 in numbers**

Approximately 750 participants from 42 countries attended imm Cologne, which hosted a gross fair area of 137,000 m<sup>2</sup>. 110 participants came from Germany and 640 participants from other countries. Considering the estimates for the last day of the fair, approximately 42,000 trade visitors from 129 countries attended imm Cologne. At the fair, where important brands from Turkey also participated this year, approximately 50 percent of the visitors were international visitors.

The next edition of IMM Cologne will take place between 12-16 January 2025.

# Innovative

Keeping up to date in a rapidly changing market is often a challenge. Threespine® provides furniture manufacturers with a perfect solution to successfully meet the many changes in design, behaviour, and environmental standards that the industry is facing.

# furniture assembly made for the future

**T**hreespine makes furniture assembly easy, fail-safe and up to 10 times faster than any traditional alternative. This ground-breaking technology, developed and licensed by Vålinge Innovation, is recognised worldwide as the first quick and effortless solution to assemble furniture without needing tools or fittings. You just click the panels together. With an integrated locking system, all joints are hidden, and you avoid visible holes. The result is solid, flawless furniture, regardless of whether assembly is done in the factory or by the consumer.

Disassembly is just as easy as assembly and re-assembly. Parts are easily removed and replaced, which extends the potential life of the furniture, creates new design opportunities, and facilitates recycling – all sought-after advantages to meet the changes ahead.

The advantages of Threespine are many. Several leading furniture manufacturers are already using the technology, making their experience extra interesting to hear about.

FORTE is one of Europe's most influential ready-to-assemble furniture producers, when asked why they chose Threespine their President, Maria Florczuk, says: "This technology just clicks with me. It brings a new consumer experience and makes assembly easier and more intuitive. The possibility for easy dismantling extends the product lifecycle and facilitates recycling, both being big steps towards one of our most important goals for the upcoming years – sustainability".

# Innovations do not stop at ARTPAN & ARTLAM

As a company that constantly follows and studies market dynamics and expectations with the mission of the Address of Innovations, we launched our new CPL Laminate Product group, for which we have been continuing our R&D studies for about 2 years, with our ARTLAM brand, at the October 2023 Tüyap Intermob fair and introduced our 2024 Collection

2024, which is a first in Turkey, distinguishes itself from domestic production with its water and moisture resistant structure, which can be used in wet places and with its high strength Green HDF raw material, finishing, production and pressing technology, as well as different models in trendy colors, modern lines, size advantages and differences in quality details. Our New Generation CPL Laminate series products have been very popular since the fair and have already reached approximately 100 exhibition points. This product will enter our stocks in significant quantities starting next month and will be the indispensable choice of domestic and international elite prestigious project owners, architectural groups and decoration companies through our distinguished manufacturer dealers in 2024.

In addition, we maintain our difference in the market with our quality details and natural wood coated decorative wall panels, which we introduced for the first time at the Intermob fair with the DecoWall by ARTPAN brand. In this context, in line with the sustainable growth targets of our brand and company, our new product groups, which stand out with their unique features and are a source of motivation for us, we believe that these innovations will increase our sales volumes and capacity utilization rates in the export markets in 2024, both in terms of market segmentation and penetration in the domestic market. We believe it will make a positive contribution.

ARTPAN & ARTLAM innovations will continue.

# MALAYSIAN INTERNATIONAL FURNITURE FAIR

CELEBRATES 30<sup>TH</sup> ANNIVERSARY  
OF GLOBAL TRADE

**M**alaysia International Furniture Fair (MIFF), Southeast Asia's largest and most global furniture fair, held a spectacular gala dinner on December 8 to celebrate its 30th anniversary ahead of the 2024 fair.

brought together 500 distinguished guests, loyal exhibitors and business partners of the Malaysian furniture industry.

Celebrating the occasion as the Guest of Honor, Deputy Prime Minister and Minister of Plantations and Commodities, Yang Amat Berhormat Dato ' Sri Fadillah He became Yusof . The sparkling Oscar-themed night kicked off the work of the MIFF fair , which is planned to be held between 1-4 March 2024 .

Founded in 1995, MIFF has played a key role in expanding the local furniture industry over the years. Recognized as a top 10 furniture trade event globally, it is the largest export platform for Malaysian wooden furniture and office furniture in Southeast Asia.

its launch , MIFF has generated total sales of US\$18.4 billion and welcomed 182,000 buyers from 141 countries and regions. It had a stellar year in 2023, with a record \$1.21 billion in on-site sales and 673 exhibitors.

Award-winning fair, current MIFF President Datuk Dr Tan Chin It was founded by Huat with 152 local participants. Foreign exhibitors made their debut in 1999 and their numbers are growing exponentially thanks to MIFF's interest in international buyers. Datuk praised the Malaysian furniture industry and local authorities for supporting the fair from the beginning. Dr Tan said MIFF will continue to be the flagship for Malaysian furniture exports, to strengthen the country's position as a global manufacturer.

"MIFF started as a small fair in 1995. We worked hard to make it successful. Today, MIFF is one of the 10 largest furniture fairs in the world and the largest in Southeast Asia. For this reason, I can sincerely say that MIFF would not have become what it is today without the support of the Malaysian furniture industry." Datuk said. Dr Tan.

also expressed his gratitude to the Malaysian government and institutions for their strong support to MIFF , as well as MIFF's strategic partner, Muar Furniture Association, for their fruitful alliance over the past 10 years. Awards were presented to 117 loyal participants, including companies that participated for 10 to 30 consecutive years (1995-2024), for their unwavering support.

These include 17 companies exhibited for over 25 years: Boston Office Furniture, CK Ban Soon Lee Industries , Chuanheng Furniture Products, Kinheng Furniture, Latitude Tree Furniture, LB Furniture, Merryfair Chair System, Pipesway Furniture, Poh Huat Furniture Industries, Seng Yip Furniture, Seni Daya Woods Industries , Shantawood , Winner Office Network, YB Woodworking Industry, Malaysian Forest Research Institute, Malaysian Timber Council and Malaysian Timber Industry Board.

MIFF 2024 will be held again at the Malaysian International Trade and Exhibition Center (MITEC) and World Trade Center Kuala Lumpur (WTCKL), with 17 halls to showcase contemporary designed home furniture, office and hospitality furniture, accessories, décor, components and a variety of products.

Malaysia's biggest exporters will be joined by exhibitors from Mainland China, Indonesia, Singapore, South Korea, Taiwan, Thailand, Turkey and Vietnam.

" On behalf of Muar Furniture Association, I extend my sincere congratulations on the 30th anniversary of MIFF . This is truly a turning point for MIFF and also for the Malaysian furniture industry. MFA is proud to share this journey with MIFF. This is also an opportune time to reaffirm our strategic partnership with MIFF, which began in 2013. I am confident that MFA and MIFF will continue the strong momentum in our relationship to create new opportunities for the Malaysian furniture industry." -- Mr. Steve Ong , President, Muar Furniture Association, MIFF Strategic Partner.

Visit the MIFF website ([www.miff.com.my](http://www.miff.com.my)) to keep up to date or register as a buyer.

Kastamonu Entegre, which adds value to living spaces with its innovation, quality and sustainability-oriented approach, exhibited its innovative products at the Domotex fair. Kastamonu Entegre attracted great attention with its innovative solutions at the fair where the latest parquet trends in the world were determined.

# Kastamonu Entegre

## Appeared at Domotex Fair with Its Innovative Products!

Domotex 2024, the international carpet and floor coverings fair held in Hanover, Germany, between 12-15 January, brought together industry professionals from all over the world. Kastamonu Entegre, which emerged from these lands and became a strong global player in the wood-based panel industry, attracted attention at the fair with its innovative products and environmentally friendly solutions that shape the sector. At the fair, where durability, sustainability and nature-inspired designs stand out in floor coverings, Kastamonu Entegre introduced its latest products and technologies at its specially designed stand for visitors. Company; Floorpan,

which offers solutions that make a difference in closed spaces, offices, residences and flooring with its quick and easy installation, hygienic structure, environmentally friendly features and design options, introduced the most innovative products from the Artfloor and Stepclick flooring collections produced specifically for export markets at the fair. Blue Angel, which certifies the environmentally friendly production of Kastamonu Integrated parquet collections certificate, A+ product quality in VOC emission measurement standards, Hygiene+ feature, quality and water resistance features and wide color options were met with interest at the fair.

# Burak Teker A.Ş.

## from 1985 to 2024

Founded in 1985 in Istanbul as a modest sole proprietorship under the name of Burak Ticaret, Burak TEKER company developed its commercial activities, which started with furniture wheels, and turned to production and became a registered company that produces its own patented products from the molding house. After a while, the company increased its production capacity under the title of BURAK TEKER A.Ş and became an important manufacturer company, exporting to 20 countries today.

Today, the company, which is organized with a production infrastructure in four different locations, has become an organization that produces in a 4000 m<sup>2</sup> closed area. Burak Teker, which carries out all production processes within its own structure, constantly improves itself with machinery and new mold investments. Focusing on marketing and R&D investments, Burak Teker A.Ş. develops its brand and customer portfolio by participating in important international fairs.

# Мebel

## Moscow fair

took place between  
20-24 November 2023

Turkey's participation in the 34<sup>th</sup> International Furniture, Design and Decoration Fair "Mebel 2023", held in Moscow on 20-24 November 2023, was organized by the General Secretariat of the Aegean Exporters' Association. Turkish companies were represented at a common info stand under the umbrella of the Furniture Exporters' Association. Many companies from the furniture and sub-industry sector attended the fair.

- RusMebel Fair. It is organized with the participation of the Russian Ministry of Industry and Trade, representatives of the Russian Association of Furniture and Woodworking Enterprises and experts from relevant sectors.
- Furniture, accessories, forest products and Interior Design:
- Mebel is one of the most important furniture fairs and main industry events in Russia and Eastern Europe. Every autumn the Expocentre showcases new collections and the best in furniture fashion.

It brings together leading global brands and manufacturers, designers and interior designers. Everyone who attends the fair comes to this fair to enjoy business communication and find new opportunities for development. The fair presents the latest trends of the furniture market and brings together manufacturers and distributors with customers. Furniture from a wide range of segments for bedrooms, dining rooms, living rooms, nurseries and kitchens, as well as sofas and armchairs, hardware, finishing materials, accessories and various decor items are exhibited at this fair.

# 53<sup>rd</sup> CIFF Guangzhou

Office and Commercial Space: The world's largest  
furniture platform for the tertiary sector;

everone

*53rd CIFF Guangzhou 2024**Phase 1 - 18-21 March 2024**home furniture, home decoration and home textiles, outdoor and leisure furniture**Phase 2 - 28-31 March 2024**office furniture, commercial furniture, hotel furniture and furniture machinery and raw materials*

Guangzhou, which will take place from 28 to 31 March 2024, will focus on furniture for workplaces and commercial spaces and will be dedicated to materials, components and machinery for the furniture industry. It will be completed with Guangzhou.

pavilions in more than 240,000 square meters of exhibition space in areas A, B and D of the Canton Fair Complex. With an optimized layout that is 9% larger than the 2023 edition, this year's CIFF Guangzhou is the world's largest exhibition with Office and Commercial Space.

Organized with the theme 'New Office Fashion, New Commercial Trend', the Office and Commercial Space Exhibition consists of three main sections: Office Environment, Office Seating Areas and Public Commercial Space.

The Office Environment section in Area A offers comprehensive solutions for the configuration of work environments, such as office systems, accessories, metal furniture and secure smart archives, avant-garde trends for the smart office and furniture for facilities for healthcare and customers' needs.

Representing the world's largest exhibition dedicated to seating alone, the Office Seating Areas section spans 80,000 square meters in Area D, with a total area of 33% more than the 2023 edition.

Office chairs and executive chairs. Lounge, reception and visitor seating areas. An offer that has been on the rise since the pandemic, distinguished by its outstanding domestic market for office furniture as well as its export-oriented business, which not only brings thousands of international buyers to Guangzhou, but also pays due attention to design, technology and technology-related questions. Ergonomics above all else to highlight the importance of health and well-being in the workplace.

The Public Commercial Space section in Area B showcases the best solutions for school furniture, hotel furniture and public spaces such as cultural, transportation and sports venues. These are all constantly developing areas where the demand for better quality and more advanced furniture is high, both internationally and in China, especially in the rapidly developing school sector.

# ISO 14064

## in Full Details - Greenhouse Gas and Emissions Management System

**Dilek Aşan**  
/ Educator

**ISO 14064 - Greenhouse Gas and Emissions Management System:** Global warming and climate change are one of the biggest environmental problems of today. The ISO 14064 standard was developed to standardize the measurement, reporting and verification processes of greenhouse gas emissions, which are one of the main causes of these problems.

**What is a Greenhouse Gas?** Greenhouse gases are gases that occur naturally in the atmosphere or are formed as a result of human activities. While these gases allow radiation from the Sun to reach the Earth's surface, they prevent radiation reflected from the surface from escaping back into space.

Due to these properties, greenhouse gases create a "greenhouse effect" in the atmosphere, causing the Earth's surface temperature to increase. Major greenhouse gases include carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O) and fluorinated gases.

Human activities, especially the burning of fossil fuels, deforestation and industrial processes, have led to increased concentrations of these gases in the atmosphere. This increase triggers global warming and climate change problems.

**How to Reduce Greenhouse Gases?** Global warming and climate change are one of the greatest environmental threats facing our planet. It is the responsibility of both individuals and businesses to reduce greenhouse gas emissions, which are one of the main causes of this threat. Methods to reduce greenhouse gas emissions are critical steps to be taken for a sustainable future.

### Greenhouse Gas Reduction Methods for Businesses

**ISO 14064 Application:** The ISO 14064 standard helps businesses measure, report and verify their greenhouse gas emissions accurately and transparently. Applying this standard helps businesses set and achieve emissions reduction targets.

**Energy Efficiency:** By providing energy efficiency in buildings, they can reduce the amount of energy used for heating, cooling and lighting.

**Use of Renewable Energy:** They can reduce the use of fossil fuels by investing in renewable energy sources such as solar, wind and hydroelectricity.

**Waste Management:** They can reduce the amount of waste through methods such as recycling and composting.

**Transportation:** They can reduce emissions from transportation by using electric vehicles, hybrid vehicles, or more efficient vehicles.

**Supply Chain Management:** They can reduce greenhouse gas emissions by working with sustainable suppliers and developing strategies to reduce emissions in the supply chain.

**Training and Awareness:** By providing training to their employees and stakeholders about greenhouse gas emissions and reduction strategies, they can raise awareness of the entire organization on this issue.

**Technological Innovations:** They can make their production

processes more sustainable by investing in technologies that produce less emissions.

**Sustainable Product Design:** By considering sustainability criteria during the design phase of products, they can reduce emissions throughout the entire life cycle of the product.

### **Greenhouse Gas Reduction Methods for Individuals**

- **Energy Saving:** They can reduce energy consumption with simple steps such as using energy-saving bulbs at home and keeping electronic devices off.
- **Public Transportation and Walking:** They can reduce transportation-related emissions by reducing car use or traveling by bike.
- **Planting Trees:** Trees absorb carbon dioxide from the atmosphere. Individuals can offset greenhouse gas emissions by planting trees or preserving forested areas.

These methods can help both businesses and individuals reduce greenhouse gas emissions. These are important steps that

can be taken to alleviate the problems of global warming and climate change.

### **What is ISO 14064?**

ISO 14064 is a standard created to standardize the measurement, reporting and verification processes of greenhouse gas emissions in an international framework. This standard helps businesses and organizations calculate, report and verify their greenhouse gas emissions and removals accurately, consistently and transparently.

ISO 14064 was created by the International Organization for Standardization (ISO). This organization develops industrial and commercial standards to facilitate trade, foster innovation and deliver solutions around the world .

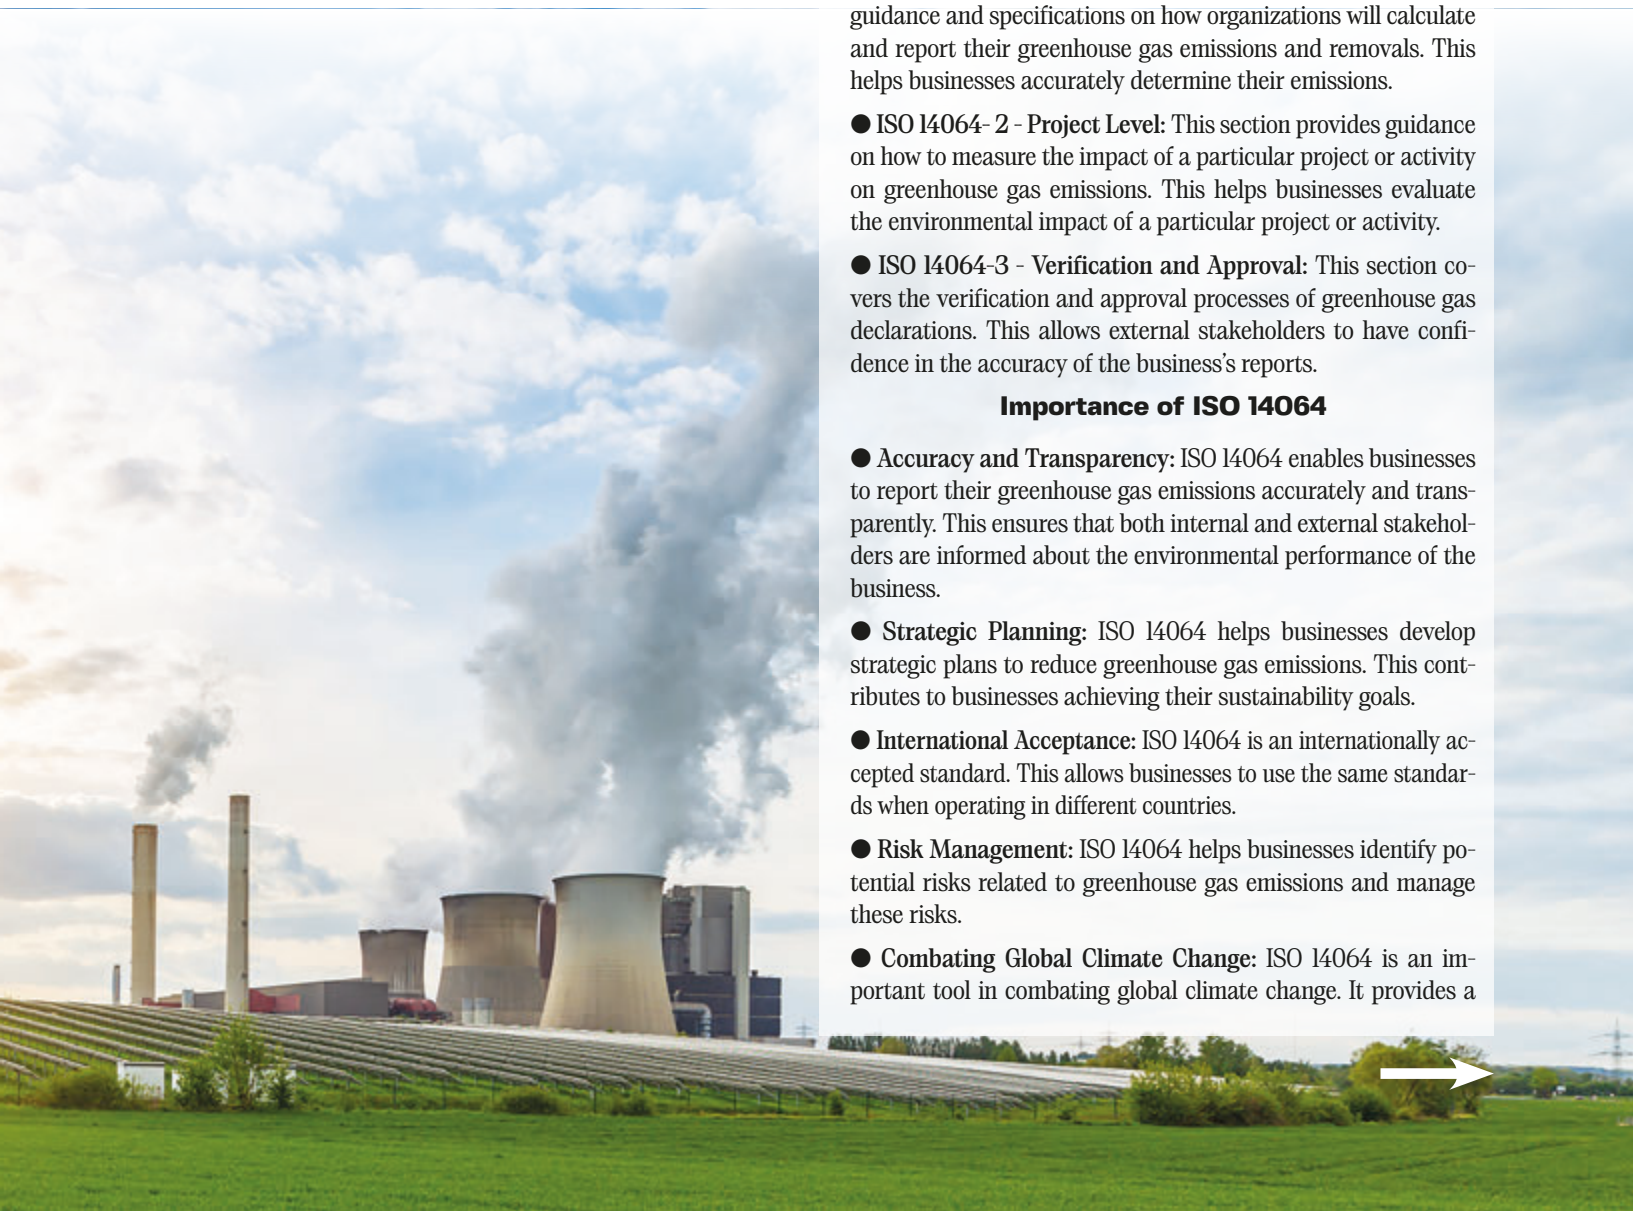

ISO 14064 plays an important role in combating global climate change and contributes to businesses achieving their sustainability goals.

### **Parts and Purposes of ISO 14064**

- **ISO 14064- 1 - Organization Level:** This section contains guidance and specifications on how organizations will calculate and report their greenhouse gas emissions and removals. This helps businesses accurately determine their emissions.
- **ISO 14064- 2 - Project Level:** This section provides guidance on how to measure the impact of a particular project or activity on greenhouse gas emissions. This helps businesses evaluate the environmental impact of a particular project or activity.
- **ISO 14064-3 - Verification and Approval:** This section covers the verification and approval processes of greenhouse gas declarations. This allows external stakeholders to have confidence in the accuracy of the business's reports.

### **Importance of ISO 14064**

- **Accuracy and Transparency:** ISO 14064 enables businesses to report their greenhouse gas emissions accurately and transparently. This ensures that both internal and external stakeholders are informed about the environmental performance of the business.
- **Strategic Planning:** ISO 14064 helps businesses develop strategic plans to reduce greenhouse gas emissions. This contributes to businesses achieving their sustainability goals.
- **International Acceptance:** ISO 14064 is an internationally accepted standard. This allows businesses to use the same standards when operating in different countries.
- **Risk Management:** ISO 14064 helps businesses identify potential risks related to greenhouse gas emissions and manage these risks.
- **Combating Global Climate Change:** ISO 14064 is an important tool in combating global climate change. It provides a

framework for businesses to measure, reduce and verify their greenhouse gas emissions.

- **Competitive Advantage:** Businesses with ISO 14064 certification can gain a competitive advantage by showing their commitment to sustainability.
- **Stakeholder Relations:** Implementation of the standard strengthens businesses' relationships with their stakeholders, as stakeholders receive assurance that the business takes its environmental responsibilities seriously.
- **Sustainable Development Goals:** ISO 14064 helps businesses contribute to the United Nations' Sustainable Development Goals (SDGs).
- **Cost Savings:** Strategies to reduce greenhouse gas emissions can lead to efficiency increases in energy and resource use, resulting in cost savings.
- **Corporate Reputation:** Compliance with the ISO 14064 standard increases the corporate reputation of businesses and demonstrates their commitment to environmental responsibility.
- **Legal Compliance:** Many countries have legal requirements governing the measurement, reporting and verification of greenhouse gas emissions. ISO 14064 helps businesses comply with these legal requirements.

Implementation of the ISO 14064 standard helps businesses improve their environmental performance, manage risks and achieve sustainability goals. Therefore, the importance of this standard is increasing.

#### ISO 14064 - Greenhouse Gas and Emissions Management System

##### How to Get ISO 14064?

Obtaining ISO 14064 certification shows that businesses carry out the measurement, reporting and verification processes of greenhouse gas emissions in accordance with international standards. The basic steps to follow to obtain this document are:

##### ● Preliminary Research: First, ISO 14064

A preliminary investigation should be conducted to fully understand the requirements and scope of the standard. This will help you better prepare for the documentation process.

- **Internal Audit:** The company's current greenhouse gas emission measurement, reporting and verification processes should be evaluated and its compliance with the ISO 14064 standard should be determined.
- **Identification of Deficiencies:** As a result of the internal audit, areas that do not comply with the requirements of the

standard should be identified and an action plan should be created to eliminate these deficiencies.

- **Implementation of the Action Plan:** The action plan created to eliminate the identified deficiencies should be implemented.
- **Certification Body Selection:** An accredited certification body must be selected for ISO 14064 certification. This organization will carry out the certification process and issue the certificate at the end.
- **External Audit:** The selected certification body will conduct an external audit to evaluate the business's compliance with the ISO 14064 standard.
- **Certification:** As a result of external audit, if it is decided that the business meets the requirements of the ISO 14064 standard, an ISO 14064 certificate is issued by the certification body.
- **Continuous Monitoring and Review:** Once the certificate is received, the business must constantly maintain compliance with the requirements of the standard. The certification body re-certifies at regular intervals.

##### It checks this compliance by performing audits

Obtaining ISO 14064 certification is a prestigious achievement for businesses both nationally and internationally. This document shows that the business takes its environmental responsibilities seriously and manages greenhouse gas emissions in accordance with international standards.

# Kayalar Kimya

## Once Again Ranked Among the Stars of Exports

Kayalar Kimya was awarded in the “Paint, Varnish and Inks Exports” category at the 2023 Stars of Export Awards organised by the Istanbul Chemicals and Chemical Products Exporters’ Association with its successful export activities to nearly 55 countries.

Since 1976, Kayalar Kimya has been one of the leading companies in the sector with its rich product range from paint to varnish, from water-based outdoor wood paint to industrial paint. Kayalar Kimya, which makes a difference in the fields in which it operates with Genç, Düfa, Woodsol and Genç Noroo brands, aims to achieve sustainable growth with a focus on R&D, production and export in the coming period. With this focus, Kayalar Kimya was once again deemed worthy of an award by ranking 4th in the “Paint, Varnish and Inks Exports” category at the Stars of Export Awards organised by the Istanbul Chemicals and Chemical Products Exporters’ Association (İKMİB) to honour and encourage member companies in the chemical industry for their success in exports.

Tolga Kayalar, Member of the Board of Directors of Kayalar Kimya, said: “In addition to our activities in Turkey, we also attach great importance to the global arena. We conduct export operations to approximately 55 countries. We are either the market leader or among the top three companies in the countries we export to. Our export portfolio covers a wide range, including furniture paints and varnishes, exterior wood paints and varnishes, and construction paints. As a result of our export achievements, the Turkish Ministry of Economy included our brand GENÇ in the TURQUALITY program, which is the world’s first and only state-funded branding program, as of December 2016. GENÇ is the first brand in its industry to be included in the program. We proceed on our journey with many firsts both in the local market and the global arena. Driven by our innovative perspective, entrepreneurial spirit, and growth strategy, we aim to make new investments in existing and new areas.”

[contracts@furnicept.com](mailto:contracts@furnicept.com)

### OUR LAUNCH PROJECT: THE WORLD'S BIGGEST FOOTBALL EVENT

As Furnicept Contract, the most important indicator of our customers' trust in us has been the BIGGEST FOOTBALL EVENT OF THE WORLD, where we are among the top 3 international suppliers as our launch project.

Furnicept Contracts contributed to all the event areas of the cup with its products where it shipped approximately 15 thousand products in the project it provided extensive services including the initial concept stage and the services after installation.

A successful launch was made with the brands we represent and our business partners at the trophy event, where we supplied more than 70 product types such as armchairs, tables and accessories.

### COMPREHENSIVE PRODUCT RANGE AND SERVICES

A comprehensive product portfolio of loose and panel furniture, interior accessories, furniture accessory elements, kitchen and furniture equipment.

Production of private label/project-based furniture with Furnicept suppliers that meet the needs of retail brands and contractors.

Inclusive project management from concept to production planning, continuous ordering, supply management and logistics operations with additional product services.

### WE SUPPORT YOUR CONTRACT PROJECTS WITH EXPERIENCE

Partnerships over 30 years.

First-class domestic and European manufacturers.

Specialized suppliers across loose and panel furniture, furniture and kitchen accessories.

Innovative product development by working with partners using industry standard practices.

### QUALITY APPROVED PRODUCTS

As Furnicept Contract, we ensure that our entire product range is accredited and certified.

In this way, we assure our customers that their projects meet their structural integrity and product performance requirements.

# WoodTech Fair 2023:

## Breakthroughs Leading the Wood Processing Industry

The wood processing industry, which provides products to a wide range of companies in the furniture, construction, interior decoration, packaging, and other industries, is one of the most important industrial branches of Türkiye. The wood processing industry witnessed important developments and innovations in 2023. WoodTech, which is Türkiye's and the region's largest and longest-running trade fair in the field of wood processing machinery, cutting tools and hand tools in this industry, stands out as the business platform where these important developments took place.

The WoodTech Fair, held at the Tüyap Fair and Congress

Center in Istanbul on October 19-23, 2023 in cooperation between RX Tüyap and the Turkish Woodworking Machinery Industrialist Association (AIMSAD), attracted great deal of attention as a commercial event exhibiting the latest technological developments in the industry. The fair brought together wood processing machinery manufacturers and suppliers as well as industry professionals, giving them the opportunity to present the latest technologies and innovations in the industry. Innovations in the fields of automation, data analytics and environmental sustainability were included among the focal points of the fair.

## **Health and hygiene standards are being redefined**

# Innovative solution for interior spaces from **Kastamonu Entegre:** Compact Panel (CDF)

Kastamonu Entegre, which adds value to living spaces with its innovative products; launched its new product, Compact Panel, with Safe Surface technology, which provides strong surface protection against bacteria, viruses and fungi.

**K**astamonu Entegre, the global brand of the wood-based panel industry, offers its Compact Panel (CDF) product, which stands out with its durability, ease of use and new generation hygiene approach, to consumers with its 12 mm thickness, three different sizes and a wide range of colors.

### **Superior quality, durability, trust**

Kastamonu Entegre's innovative product Compact Panel ; It is equipped with Safe Surface technology, which effectively prevents the formation of bacteria, viruses and fungi on surfaces . The advanced technology integrated into the panel provides superior protection against harmful microorganisms, creating safe spaces in a wide range of areas, from residences to commercial areas.

Produced from high-density compact material, the panel stands out with its features such as water and moisture resistance, strong structure against impacts and scratches, and easy cleanability. Compact panel produced in E0 emission standards , Thanks to its homogeneous black fiber distribution , it does not require edge banding and offers easy application on wood processing machines such as milling and CNC .

### **Rich options for holistic designs**

The color options of the Compact Panel, which provides integrity in design with the possibility of double-faced use and easily adapts to different interiors, include Black, Lacquer White, Anthracite, Moonstone, Light Grey, Dark Yellow, Garden Oak and marble patterns Luanda and Calcutta .

Compact Panel; It can be preferred as a decoration and furniture component in common use areas such as interior wall coverings, toilet cabins, school furniture and decorations, hospitals, cafeterias, store walls, changing rooms, hotel and plaza lobbies, as well as airports, offices and industrial areas.

Kastamonu Entegre, which offers innovative solutions with its approach that prioritizes the safety of living spaces and public health, aims to redefine health and hygiene standards with this product, taking into account the changing market dynamics with the global epidemic.
